FRAME 16–

The screenshot shows a Java Swing window titled "Health and Fitness". The window has a standard Mac OS X title bar with a red close button, a yellow maximize button, and a green window control button. Inside the window, there is a "< Back" button in the top left corner and a red "Exit" button in the top right corner. The main content area has a title "Health and Fitness" centered at the top. Below the title, there is a label "Need a Trainer for (Please Specify):" followed by a large, empty text area with a vertical scrollbar. Below this, there are four labels: "Age:", "Gender:", "Height:", and "Weight:". Each label is followed by a text input field. The "Age:" and "Gender:" fields are dropdown menus with "<Not_Selected>" selected. The "Height:" and "Weight:" fields are empty text boxes. Below these fields, there is a label "Preferred Timing:" followed by an empty text box. At the bottom center of the window, there is a "Request" button.

CONCLUSION

I'm Grateful to Dr.Deepak Pithadia and Our Glamorous School for giving us this wonderful opportunity to let us make our Own Application. It was a Mesmerising project to do. It taught us how to analyse a common man's problem and find an efficient solution for it. It also taught me what effort is put behind the simple technologies we use today. In all making this Project was an amazing learning experience.
